

BRIGHT IDEAS

New from GOTHAM "Elevations"

elevations™

There are an abundance of pendant lighting products on the market, but none quite so multifaceted as the Elevations™ high performance luminaire. Not surprising, considering the source. Gotham has been known for visionary leadership in downlighting since the early days of modernist architecture. A natural extension of our recessed offering, Elevations advances Gotham's mission to create architectural lighting solutions that are both innovative and expressive - embracing new technologies while expanding the choices for lighting professionals

Par Downlights from GOTHAM

Lighting professionals value PAR lamp downlights because of the wide range of distributions available from the same aperture. But there's a downside. Conventional luminaire reflectors, combined with modern PAR lamp designs, create beam striations and unwanted stray reflections.

Gotham has met this challenge with innovative optics developed specifically for PAR lamps. The result is a "clean beam," no matter which lamp is used. From pin-point spot to broad flood distribution, the new APR PAR downlights deliver the quiet, comfortable illumination you would expect from a pioneer in recessed lighting.

Gotham APR downlights blend advanced optics with thoughtful engineering. The patent pending reflector design produces exceptionally clean scallops and minimal beam striations. Solid mechanical design is characterized by adjustable mounting bar hangers, innovative stainless steel bow spring trim retention system, and convenient access to lamps.

Candéo Architectural Lighting from GOTHAM

Architectural Record magazine published the results of this annual competition in their December 2004 issue.

Selection was made by a jury of industry experts in the fields of architecture, design and product development.

Competing products were submitted in 14 categories related to construction and architecture. In the category of "Electrical," Candéo (page 324) was chosen as one of 15 lighting products and only three indoor luminaires to receive this recognition.

Candéo features a unique three-part optical system. 1) Outer cone, 2) dual-finished inner reflector, 3) interior finishing trim. These components interact to create the effect of a clear specular aperture floating within a pool of diffused light.

Klopfenstein's Lighting Inc

1128 Nuuanu Ave Suite 101
Honolulu, HI 96817-5119

www.kli-hi.com

KLI is known as the premiere lighting manufacturer's representative in Hawaii since 1976. In general, we promote our lighting manufacturers through Architects, Engineers and Designers and distribute through wholesale electrical houses.

KLI was originally incorporated in 1976 under the name KLOPFENSTEIN'S and operated out of a house in Hawaii Kai. In December of 1987 we moved our operations into our present location on Nuuanu Ave in Downtown Honolulu. In 1997 we reincorporated as KLOPFENSTEIN'S LIGHTING INC (KLI).

Our primary purpose is to provide the best product for your application with efficient service for all your needs.
