

BRIGHT IDEAS

Spotlight: Jesco

JESCO LITES is a multifaceted lighting company offering a comprehensive selection of outstanding illuminated products. The company has built its reputation for excellence by providing new and creative lighting fixtures that ship on time and meet client's expectations and budget.

A brand new facility, located in Maspeth, Queens, New York, includes huge inventories of economically priced, creatively designed, quality made lighting products.

From customer care to production staff, JESCO is always eager to help solve the technical, economical and service concerns for a comprehensive professional clientele and their respective job requirements.

In addition, their network of national sales representatives are dedicated to collaborating with their customers and the design community to help develop practical JESCO solutions.

The JESCO LITES family of lighting includes line and low voltage track and features their signature series JESCO SATIN. This series is widely acknowledged as the best and most complete selection of integrated satin chrome lighting products available.

Litecontrol Introduces SAE Systems P-ID-9800

Litecontrol announces, SAE Systems™ P-ID-9800, the newest addition to its Suspended Indirect/Direct product line. The P-ID-9800 fuses design and performance into an affordable light fixture.

Matching the stylish shape of the indirect perforated, slotted, or solid 9800 fixture, P-ID-9800 offers a clean design look with all-steel construction to ensure high-quality installation for the varied requirements of office, classroom and retail applications.

This new fixture is available with one-, two- and three-lamp T8, T5, or T5HO cross-sections in four-, eight- or twelve-foot lengths. P-ID-9800 also offers two end cap styles—flat (standard) or sculpted (optional) - and five diffuser options that follow the contour of the fixture housing. All offer lift-and-shift operation that provide easy access to the lamps for maintenance and replacement.

Litecontrol—an employee owned company, founded in 1936, is a leader in the design, development, manufacturer of innovative, high quality architectural lighting systems. Primary markets for the Company's products include office buildings, schools, hospitals, laboratories, libraries, and retail spaces throughout North America. With over 200 employees, the Company fabricates, paints, and assembles its products at two fully integrated manufacturing facilities totaling 450,000 square feet in Hanson and Plympton, Massachusetts.

FEATURES

- Clean, arcuate form with downlight
- Curved baffle blades match housing form
- All steel precision-tooled construction in four-, eight-, and twelve-foot lengths
- Approximately 65% indirect / 35% direct
- "Yoke" aircraft cable mounting provides exact on-module mounting at 48", 96" or 144" increments

Improved Paint Finishes for BEGA/US

In their relentless pursuit of quality, BEGA constantly evaluates and utilizes the best components and materials available. Such is the case with their paint finishes. Effective immediately, BEGA/US is pleased to announce that all BEGA standard finishes and RAL colors will be upgraded to a Marine Grade Polyester Powder Coat Paint. This super durable polyester powder paint offers the advantage of improved weather resistance, including dramatically improved fade resistance. The appearance of this new fade resistant paint, including shade, gloss level, and texture, will be identical to the former BEGA and RAL finishes.

KLI is known as the premiere lighting manufacturer's representative in Hawaii since 1976. In general, we promote our lighting manufacturers through Architects, Engineers and Designers and distribute through wholesale electrical houses.

KLI was originally incorporated in 1976 under the name KLOPFENSTEIN'S and operated out of a house in Hawaii Kai. In December of 1987 we moved our operations into our present location on Nuuanu Ave in Downtown Honolulu. In 1997 we reincorporated as KLOPFENSTEIN'S LIGHTING INC (KLI).

Our primary purpose is to provide the best product for your application with efficient service for all your needs.

New From BEGA—Linear In-Grade Luminaires

BEGA/US introduces yet another family of beautiful linear in-grade fluorescent luminaires that deliver stunning optical performance in a sleek, refined design.

These extraordinary luminaires are an ideal solution for façade and sign illumination or maker lighting for pedestrian walkways. The sleek and shallow profile is ideal for use in tight spaces, while the high output fluorescent lamping provides the added benefit of low and safe lens temperatures suitable for use in public venues.

- **Product Specifics:** Three

sizes/lengths: 25", 48 5/8" and 60 7/16".

- Lamping: T5 High Output 24W, 54W and 80W.
- Symmetrical and Asymmetrical Distributions.
- Die Cast Housing, Marine Grade Stainless Steel Trim/Faceplate.
- 1/2" Thick Tempered Glass Lens—Machined Flush to Faceplate.
- Drive Over Rated for 11,000 lbs.
